Exercises for Global Software Engineering

Activity 1 (HW) Lotus Notes Topics

Find the Homework BBoard on the project homepage and log on. Post a *Topic*. Your post may have any subject, be creative! Explain your subject in the *Message Content*. Choose the *Activity 1* category for your post and attach up to three small files.

Find your post in the *By Category* view and review it. Then edit your post and attach more files, so that your post ends up with exactly 4 attachments.

Reply to your post with a different subject and send a *Notification* to yourself. Make sure to only keep the relevant parts of the previous post that you are directly replying to. If there is nothing of relevance in your first post, do not include any part of it.

Open your email client and read the notification that you just sent to yourself.

Activity 2 (HW) Lotus Notes Issues

Log on to the Homework BBoard and post an *Issue*. Formulate the subject as a question that prompts for elaborate answers, explain the validity of the question in the *Message Content*. Your post should be about a technical issue that is relevant to the project.

Post two different *Proposals* in reply to your issue which suggest possible answers.

Post at least one argument in favor and one argument opposed of each proposal.

Activity 3 (HW) Project Address Book

From any of your posts, follow the link of your name to the project address book. Follow the *Help* link on the bottom right and read about the personal preferences for the project BBoards that you can set in the *Misc* section. Edit your address book entry and include information on how you can be reached by phone.

Open the *by Group* View and follow the link on the upper left back to the project homepage.
